

## FEED OUT TRAILER BATCH WEIGHING INSTRUCTIONS

### SETTING TARGET VALUE

1. Press 'Target' button
2. Type in desired value using number keypad
3. Press 'OK' to store value
4. Press 'OK' to return to main screen (**this value will remain in the scale until it is changed**)

#### - **START** (Button 1 on key fob)

A single press of this button will start the batch. The chute will open until the desired amount of feed has been dispersed and then the chute will close automatically.

The scale is now ready for the next batch.

#### - **PAUSE** (Button 2 on key fob)

A single press of this button during a batch will pause the current batch and close the chute. Pressing Button 1 will recommence this batch (ie. deliver the balance of that batch).

#### - **ABORT** (Button 3 on key fob)

A single press of this button during a batch will stop the current batch and close the chute. This batch is now complete and the scale is then ready to start a new batch.
